

# KITTEN WEIGHT TRACKER (Birth – 8 Weeks)

**Instructions:** Weigh kittens once daily at the same time, preferably before feeding. Healthy kittens gain 10–15 grams per day on average. If a kitten does not gain weight for 24 hours, take action immediately.

**KITTEN NAME:** \_\_\_\_\_ **LITTER ID (optional):** \_\_\_\_\_

## Helpful Notes

Use a digital gram scale for accuracy

Kittens should feel warm to the touch before feeding

If a kitten loses weight or feels cold, warm them first, then feed

Hydration and weight gain are the two most important survival indicators
